### Message from the Guest Editors

The goal of this Special Issue is to publish papers that expand our current knowledge of prenatal alcohol and other substances' exposure and FASD and make it accessible to the research community, educators, policy makers, and others interested in this area. We invite all FASD-related research submissions, and we especially encourage the submission of papers from authors in developing countries where there are less infrastructure and traditional support of research on prenatal substance use exposure and FASD. The keywords listed below provide an outline of some of the possible areas of interest.

- prevention
- treatment
- recent advances in screening and diagnosis
- therapeutic and non-therapeutic interventions
- comorbidities
- mortality
- epidemiology
- economic cost
- risk factors of maternal substance use and FASD
- outcome trajectories (children, adults, and elderly people with FASD)
- law enforcement
- service delivery (i.e., health care, special education, etc.)
- experience and perception (patients and carers living with FASD, and practitioners)
- policy

### Editor-in-Chief

**Prof. Dr. Paul B. Tchounwou**

Department of Biology, College of Science, Engineering and Technology, Jackson State University, 1400 Lynch Street, Box 18750, Jackson, MS 39217, USA

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

### Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), Social Sciences Citation Index (Web of Science), MEDLINE (PubMed), Scopus (Elsevier) and other databases. Full-text available in PubMed Central.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 4.96 days (median values for papers published in the first six months of 2018).
