

Nordic Alcohol and Drug Policy Network Action Plan 2020

NordAN, as a regional advocacy network, aims to address different cross-border issues, advocate for introduction and implementation of international and local alcohol and drug policies and support member states and organisations in national developments.

Theme of the year: alcohol and cancer

NordAN is preparing a project application to the SAFF Foundation for a project in 2020, focusing on alcohol and cancer awareness.

The project will cooperate with NordAN member organisations, cancer societies and other relevant institutions.

Nordic-Baltic alcohol and drug policy

NordAN continues to support the introduction and implementation of evidence-based alcohol and drug policies, both on the international and local level.

Building and keeping a good contact and cooperation with organisations like Nordic Council of Ministers, Nordic Council, Baltic Assembly, Nordic Welfare Center, NDPHS etc.

We are advocating and supporting the developments of pan-Nordic/Baltic policies. We are supporting member organisations in national developments. Responding to requests and providing an international experience (policy comparisons in different countries etc.)

We are supporting and are actively involved in the work of Eurocare, the European Alcohol Policy Alliance. Giving input to various EU and WHO consultations.

Nordic Alcohol Policy Report

Nordic Alcohol Policy Report (started in 2015) gets regular updates, and new chapters as new developments occur. Sections on cannabis (regulations, use and positions) will be added.

Membership

We will develop regular contact with member organisations — weekly newsletters, cooperation, responding to inquiries.

Search for a new member organisation from Latvia continues.
